

Jalud App - Operator Risk Types Reference

Generated from the TTC Operator Safety Risk Assessment document for prototype use.

Risk Category	Severity	Immediate	Operator Response
Passenger violence	Immediate Assistance	Yes	Panic button; silent alarm; auto-share vehicle ID, route, location, and camera/audio snapshot.
Weapons threat	Immediate Assistance	Yes	Silent alarm; request police/security; mark as high priority; preserve evidence.
Gunshot audio trigger	Immediate Assistance	Yes	High-priority audio alert; share location; recommend stop/evacuation procedure based on policy.
Glass break audio trigger	High	Often	Audio alert; identify cabin zone; notify Transit Control; prompt damage/security report.
Scream/panic audio trigger	High	Often	Alert driver; show nearest safe stop; suggest cabin camera check and control notification.
Fight onboard	Immediate Assistance	Yes	Request security; onboard announcement; live location pin; incident timer.
Forced door/boarding issue	High	Sometimes	Door safety alert; hold vehicle safely; notify control; log incident.
Medical emergency	Immediate Assistance	Yes	Call emergency support; notify control; show nearest stop/intersection; prompt first-aid procedure.
Driver harassment/threats	High	Sometimes	Quick report; de-escalation prompt; request supervisor/security if escalating.
Fare/payment dispute	Medium	No/Maybe	Log incident; suggested de-escalation script; escalate if threats begin.
Intoxicated/distressed rider	Medium	Maybe	Monitor; notify control; request outreach/security depending on behaviour.
Aggressive shouting audio trigger	Medium	Maybe	Moderate alert; confidence score; ask driver to confirm if safe.
Unattended bag/package	High	Maybe	Report package; share location; follow TTC procedure; avoid handling package.
Vandalism/property damage	Medium	No/Maybe	Capture report; attach photo/video; request security if active.
Crowding near operator area	Medium	No/Maybe	Onboard announcement; notify control if persistent; log route/stop hotspot.
Route hazard/collision risk	High	Sometimes	Route alert; request supervisor; share incident location; suggest safe stopping area.
Late-night/isolated stop risk	Medium	No/Maybe	Route risk indicator; optional check-in; nearby assistance info.
Service delay frustration	Medium	No/Maybe	Delay announcement script; alert control; monitor for escalation.
Communication failure	High	Maybe	Offline event logging; retry queue; fallback phone number; show connection status.
Driver distraction	High	Preventive	Hands-free voice alerts; large buttons; suppress low-confidence alerts; no typing while moving.
False positive audio detection	Low/Medium	No	Show confidence score; allow one-tap confirm/dismiss; retain event for model improvement.
Camera/audio blind spot	Medium	No/Maybe	Show sensor coverage status; allow manual incident report.
Privacy and data retention	Medium	Policy Required	Role-based access; retention limits; audit logs; clear privacy notice.
Cybersecurity/data breach	High	Technical Response	Encryption, access control, monitoring, breach response plan.
